

# Local and Regional Authority

## Strategy | Objective | Policy | Indicators

### Monitoring, Analysis and Reporting

#### Multiple uses

- Strategy, Objective and Policy Monitoring
- Annual Monitoring Report
- Local Development Framework
- Regional Spatial Strategy
- Sustainability Appraisal

#### Community Strategy

- Ad-hoc querying
- Public Access

#### Key features

- Manage multiple strategies & policies
- Analytics & Reporting
- Survey creation and management including indicators, formulae, guidance and reports
- Intuitive, guided, online data entry process

#### Numeric, textual and derived indicators

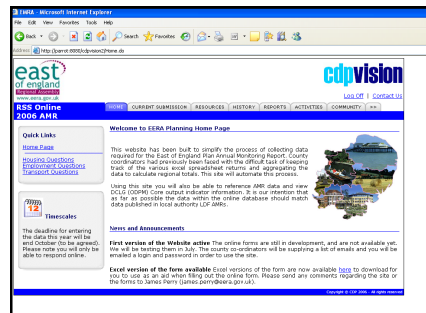

- Supports granular 'site' level data and 'totals'
- GIS integration
- Manage government return process e.g. AMR
- News/Message Forums

#### Interoperable with current systems and data assets

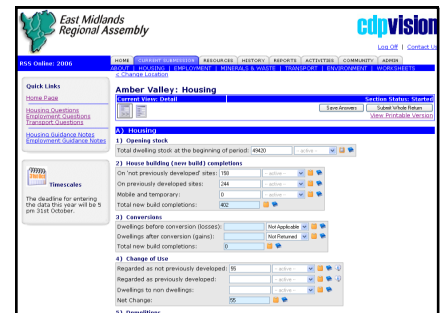

**cdpvision** is a purpose built strategy, objective and policy monitoring, analysis and reporting solution for Local and Regional Authorities. It combines sophisticated analytics, reporting and GIS capability with intelligent workflow and simple, intuitive web based wizards to provide the definitive monitoring tool. Strategy deployments can include Local Development Frameworks, Regional Spatial Strategy, Sustainability Appraisal, Community Strategy and many more. **cdpvision** is delivered as a multi-instance licence enabling many different strategies/policies to be managed separately within a common database of information.

#### cdpvision Advantage

- Automates data collection providing seamless, two way data flows including District, County and Regional level
- Fast, easy creation and management of monitoring surveys and returns
- Streamlines processes & administration creating cost savings & efficiencies
- Provides definitive intelligence view
- Enables historical and trend analysis
- Promotes 'joined up' monitoring and interoperable systems
- Increases benefits from monitoring to create valuable intelligence for all stakeholders
- Links with existing systems for data exchange and sharing
- Extensive analytics & reporting
- Advanced querying including GIS
- Expands data access throughout organisation

Data Entry Wizard for RSS Annual Monitoring Report

#### Cross department, multi-tier use

**cdpvision** is designed to support cross department monitoring for multi-discipline requirements such as LDF and RSS reporting.

**cdpvision** supports collaborative, multi-tier monitoring for co-ordinated processes including District, County and Regional level.

#### Reporting, Analysis and Querying

**cdpvision** features an integrated reporting module including prewritten reports and custom/advanced reporting tools. Custom reporting functionality allows users to easily create and publish their own reports. Power users can create complex reports using the advanced report front-end.

## Managing Government Returns

One of the key benefits of **cdpvision** is its capability to support data provision and reporting for the many Government Returns e.g. AMRs for Local Development Frameworks and Regional Spatial Strategy as well as many others. **cdpvision** supports the monitoring process itself as well as the data and reporting requirement. This includes Status Management, Workflow, Announcements, Guidance and Message Forums.

Worksheets - Employment Land Gains example

Status Management - RSS AMR Housing by District

## Automated Interfaces and Interoperability

**cdpvision** is designed with interoperability in mind and can be linked with other systems to provide cross department, multi-tier data transfer and sharing including District, County and Regional level (e.g. observatories and local monitoring tools). This enables more collaborative and co-ordinated processes between departments and different Local/Regional Authorities and eliminates duplicated effort.

Defining Custom Reports - Housing example

Message Forum - promoting coordination & communication

## Other CDP Products

- **cdpsmart** - Spatial/planning and land use monitoring
- **cdpwisdom** - Advanced reporting and analytics package
- **cdprars** - Resettlement appraisal and referral system
- **cdpmobile** - Mobile technology for PDA/handheld extensions

## Other CDP Services

- Survey/Return Managed Services
- Upgrading and enhancing existing systems
- IT Services including GIS, database, web and reporting
- Business Analysis and Consultancy
- Technical Consultancy and Software Development
- Software Support and Training

**CDP's products can be configured for virtually any monitoring, analysis and reporting requirements. Ask our experts for advice and guidance. We are always happy to help!**

## Selected Components

- Online data entry wizard
- Custom/advanced reporting
- Survey Creator/Manager
- Status Management
- Workflow/Business Rules
- Guidance/Help
- News and Calendar
- Message forums

## Supported Technology

- Observatories for data exchange or data 'views'
- Oracle and SQL Server
- ESRI, CadCorp and MapInfo
- External reporting tools such as Business Objects/Crystal
- Local monitoring tools via XML or CSV
- Import and Export formats

## Deployment Options

- Installed (Purchased)
- Hosted (Purchased)
- Hosted (Rental)
- GIS and non-GIS options available

## Licence Options

- Multi-instance single authority (Solo)
- Multi-instance, multi-authority (Hub)
- Single-instance single authority (Lite)
- Trial licence

## About CDP

Founded in 1994, CDP is a software development consultancy specialising in designing and building custom and bespoke software solutions. CDP also has dedicated products and services within Local and Regional Government and the public sector.
